

A2
This object is achieved by the process according to the present invention. Advantageous embodiments of the invention form the subject matter of further claims.

Page 4, lines 1/16:

The invention is explained in more detail with reference to drawings.

BRIEF DESCRIPTION OF THE DRAWINGS

- A3
- Fig. 1 shows a first structure for carrying out the process according to the invention;
 - Fig. 2 shows a second structure for carrying out the process according to the invention;
 - Fig. 3 shows an adsorption device for carrying out the process according to the invention;
 - Fig. 4 shows a test structure for determining the adsorber properties and adsorber capacity;
 - Fig. 5 shows the effect of the fuel sulfur content on the NO_x conversion of an exhaust-gas after-treatment system.

DETAILED DESCRIPTION OF THE DRAWINGS

The adsorption device may be connected in series downstream of the fuel pump (Fig. 1) or as a bypass to the normal fuel supply (Fig. 2).
